

DATASHEET

Heatbeater™23

HEATBEATER
BY PPE-FACTORY

Pliable and reinforced nitrile 5-finger glove with a service temperature of up to 350 degrees Celsius.

The glove is made of a para-aramid knit that works as an isolator and reinforcement for the nitrile glove that is worn underneath. This combination glove is unique in its type and gives the nitrile glove a better isolation value and also a higher cutting and mechanical resistance.

The glove is available in the sizes 10, 11 and 12.

We recommend not to wash the glove.

Used palm-side materials:

- Para-aramid knit
- Nitrile glove

Used materials on the back:

- Para-aramid knit
- Nitrile glove
