DATASHEET Heatbeater[™]32

Pliable and highly insulating 5-finger glove with a service temperature of up to 350 degrees Celsius. The glove is made of a para-aramid loop knit that has an extra insulating and roughened viscose knit on the inside. The glove has a good mechanical resistance, a very good cut resistance and also has a good insulation value for a glove with a high level of pliability. The glove is available in one size (size 11). We recommend not to wash the glove.

Used palm-side materials:

- Para-aramid loop knit
- Roughened viscose knit

Used materials on the back:

- Para-aramid loop knit
- Roughened viscose knit

EN388 2 Abrasion

2 Puncture

4 Burning Behaviour

- 3 Contact heat
- 4 Convective Heat
- 1 Radiant Heat
- x Small drops molten metal
- x Large drops molten metal
