

# Datasheet Heatbeater 9

Robust, strong and extreme heat resistant mitten with a maximum temperature of up to 900 degrees Celsius. The mitten is made of IHR-coated fibreglass.

The mitten has a good mechanical resistance and also has a good resistance against small molten metal splashes. The mitten is also very suitable to hold and move very hot objects.

The Heatbeater 9 is also extremely cut resistant and has a very good abrasion resistance.

This mitten is available in one size (size 11).

The mitten must not be washed.

## Used palm-side materials:

- IHR coated fibreglass
- Voluminous glass fabric
- Light-duty Para-aramid felt

## Used materials on the back:

- IHR coated fibreglass
- Voluminous glass fabric
- Light-duty Para-aramid felt

## EN 388:2016

3 Abrasion  
x Blade cut  
4 Tear  
x Puncture  
F Cut

## EN 407

4 Burning Behaviour  
4 Contact heat  
x Convective Heat  
x Radiant Heat  
4 Small drops molten metal  
1 Large drops molten metal
